Published on 21 December 2018

Sotoodeh A., Attar F., Andalo C., Mirtadzadini M. & Civeyrel L. 2018. — Erratum: Article 40 (13) 2018: 171-181. Focusing on three *Verbascum* L. taxa (Scrophulariaceae) of the *Flora of Iran*. *Adansonia*, sér. 3, 40 (15): 187. <https://doi.org/10.5252/adansonia2018v40a15>. <http://adansonia.com/40/15>

Due to hurried correction of the proofs of this paper, designation of the two subspecies of *Verbascum carmanicum* (Bornm.) Hub.-Mor. was very incorrectly published according to the ICBN Art. 26 (1). The left column of page 179 should be read as follows:

Verbascum carmanicum (Bornm.) Hub.-Mor.

In Bauhinia 5: 11 (1973). — Basionym: *Celsia carmanica* Bornm., *Oesterreichische botanische Zeitschrift* 49: 51 (1899).

Verbascum carmanicum (Bornm.) Hub.-Mor.
subsp. *carmanicum*

TYPE MATERIAL. — *Bornmüller* 4257, 4258!, 4259! (syn., P[P03287427, P03287428, P03287429], B) (Fig. 3).

DISTRIBUTION. — Endemic of the irano-turanian region.

CONSERVATION STATUS ASSESSMENT. — Field observations indicated that *V. carmanicum* plants were never observed in large populations. Their geographical range of occurrence is estimated to be less than 3000 km² and severely fragmented. They were collected in less than five locations. According to the rules for classifying the rare, threatened, and endemic plants, IUCN criteria (<http://www.iucnredlist.org> [accessed: 16 March 2018]), this species should be considered as endangered [EN A1ac; B1ab (iv)].

DESCRIPTION

Plant 100-200 cm height. Bracts up to 5 mm, same as fruiting pedicel. Pedicels (fruiting) 2.5-5 mm.

Verbascum carmanicum (Bornm.) Hub.-Mor.
subsp. *kermanense* (Hub.-Mor.)

Sotoodeh, Attar, Andalo & Civeyrel, comb. nov., stat. nov.

BASIONYM. — *Verbascum kermanense* Hub.-Mor., *Bauhinia* 5: 149 (1975).

TYPE MATERIAL. — **Iran**. Kerman, Kuh-e Jebal Barez, near Deh Bakri, in rocky slopes, 1700-2700 m, *Soják* 3883! (holo-, PR image!) (Fig. 4).

DIAGNOSIS. — *Verbascum carmanicum* subsp. *kermanense* stat. nov. can be distinguished from *V. carmanicum* subsp. *carmanicum* by a combination of the following characters: Plant 50-65 cm height (vs 100-200). Bracts ovate or triangular-oval, 5-10 mm long (vs up to 5), longer than fruiting pedicel, entire (vs same as fruiting pedicel). Pedicels (fruiting): sessile or up to 2 mm (vs 2.5-5).
