Acknowledgements

We would like to thank Jérémie Ruban, whose passion for woodlice and determination to study them led him to breed *Caribodillo martinicensis* n. gen., n. sp. and therefore enabled this species to be described. Furthermore, we wish to thank Dr John McDonald who made the barcoding of the species possible. We also wish to thank Grant Wang and Liam Lewis. Lastly, we sincerely thank two anonymous reviewers for their thoughtful and constructive comments, which greatly improved this manuscript.
